Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

AAB67668 standard; Protein; 502 AA

WX B X D X A X D A B AAB67668;

11-JUN-2001 (first entry);

Amino acid sequence of a BASB109 polypeptide.

BASB109; bacterial infection; vaccine; genetic immunisation.

Moraxella catarrhalis.

WO200119996-A1.

ZXZXXX 22-MAR-2001.

14-SEP-1999; 99GB-0021691.

14-SEP-2000; 2000WO-EP09035.

(SMIK ) SMITHKLINE BEECHAM BIOLOGICALS.

Thonnard J;

WPI; 2001-257883/26. N-PSDB; AAF55658.

Novel BASB109 polypeptides of Moraxella catarrhalis useful for diagnostic, prophylactic and therapeutic purposes against microbial diseases, preferably bacterial infections

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              The present sequence represents a BASB109 polypeptide of Moraxella catarrhalis. BASB109 polypeptides and polymucleotides are useful for treating bacterial infections, and as research reagents and materials for the treatment of and diagnosis of diseases, particularly human diseases. They are useful for inducing an immune response in an individual, and to assess the binding of small molecule substrates and ligands in, for e.g. cells, cell-free preparations, chemical libraries, and natural product mixtures. BASB109 polynucleotides are useful for therapeutic or prophylactic purposes, in particular genetic immunisation and in diagnosis of the stage and type of infection.
                                                                                                                                     11-JUN-2001
                                                                                                                                                                   AAB67669;
                                                                                                                                                                                                 AAB67669 standard; Protein;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Sequence

They are useful for inducing an immune response in an individual, and to assess the binding of small molecule substrates and ligands in, for e.g. cells, cell-free preparations, chemical libraries, and natural product mixtures. BASB109 polynucleotides are useful for therapeutic or prophylactic purposes, in particular genetic immunisation and in diagnosis of the stage and type of infection.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The present sequence represents a BASB109 polypeptide of Moraxella catarrhalis. BASB109 polypeptides and polypucleotides are useful for treating bacterial infections, and as research respents and material for the treatment of and diagnosis of diseases, particularly human
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     Novel BASB109 polypeptides of Moraxella catarrhalis useful for diagnostic, prophylactic and therapeutic purposes against microdiseases, preferably bacterial infections
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Claim 3; Page 66;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           WPI; 2001-257883/26
